DOMESTIC MARKETING SECTION

TRADE CIRCULAR No. 03 DATED 23.09.2021

Lakshadweep has 36 Islands with an approximate coastal length of 132 km and these islands are facing severe threats of coastal erosion and sought Coir Board to associate with a project on Coir Geotextile-based erosion control measures/structures for coastal erosion in the Lakshadweep Islands as a facilitator. Further, as these islands are also biodiversity rich areas and the Lakshadweep Administration is compelled to adopt eco-friendly measures of erosion control.

Therefore, it is proposed to depute a delegation consisting of technical partners, industrial partners, and Coir Board officers to conduct preliminary study on the possibilities for prevention of sea erosion, using coir products.

Interested technical experts having track record in the application of Coir Geotextiles in erosion control especially coastal erosion may send their willingness to associate with the project as Technical Partner along with proof of their track record in similar projects so as to reach Secretary, Coir Board on or before 01.10.2021.

For any further clarifications, please contact us through Email ID: mktg@coirboard.org or over Telephone (0484-2351900- Extn - 923).

For SECRETARY

To: Technical Experts - As per list
